GitHub Repo Public Release Approval

Project Name: Audio Quality Research Project

Software Name: ITS-MOS-Agreement

GitHub Repo: https://github.com/NTIA/ITS-MOS-Agreement

The project identified above has met the following criteria necessary for public release:

1. ☑ The project, including the test criteria, meets the requirements defined in the ITS Software Development Publication Policy for making a repository public. The major pre-established criteria for publication are listed below, and the check mark next to each attests that the criterion has been met.

   - ☑ All CLI run without issue with no inputs and all produce useful information with --help.
   - ☑ Software can reproduce results from accompanying paper "Bounds on Agreement between Subjective and Objective Measurements."
   - ☑ Software runs basic examples included in the README with no issues.
   - ☐
   - ☐

2. ☑ Any test data necessary for the code to function is included in the GitHub repository
3. ☑ The README.md file is complete
4. ☑ The project complies with the ITS Code Style Guide or an appropriate style guide as agreed to by the sponsor, project lead, or Supervising Division Chief
5. ☑ Approved disclaimer and licensing language has been included
